

The KCL Mouse Genetics Club

Wednesday, 29th April 2009

Lecture Room Floor 18
Guy's Hospital Tower Wing
King's College London

ALL WELCOME!!

Contact: albert.basson@kcl.ac.uk

5.45-6.15pm Mixer (Function room, 18th floor, Guy's Tower Wing)

Short presentations (7-8 minutes each):

- 6:15-6:25 Agi Grigoriadis: Bone disease in c-Fos/AP-1 mutant mice
- 6:25-6:35 Ajay Shah: NADPH oxidases in cardiovascular remodeling
- 6:35-6:45 Karen Liu: Chemical genetics and craniofacial development
- 6:45-6:55 Robert Hindges: Molecules controlling axon pathfinding and synaptogenesis during development
- 6:55-7:05 Cathy Fernandez: Mouse models and behavioural endophenotypes in psychiatric disorders
- 7:05-7:15 Luigi Gnudi: Vascular Growth factors and glomerular capillary permeability
- 7:15-7:25 Mike Curtis: A new and unique mouse model of ischaemia-induced ventricular fibrillation
- 7:25-7:35 Caroline Whitehouse: Role of Nbr1 in bone remodeling
- 7:35-7:45 Martyn Cobourne: Hedgehog signalling in craniofacial development

7.45- 8.30 - Refreshments

Sponsored by Harlan UK and
